### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the paragraph that runs from lines 27 to 28 on page 6, the paragraph has been further amended to read:

FIG. 8 is a cross sectional view of the pulley assembly taken along line 8-8 in FIG. [8] 7;

2. The drawing changes, filed on Jan 9, 2004 and Mar 17, 2004 are approved.
3. The following is an examiner's statement of reasons for allowance:

Although air outlet valves (e.g. Fischer et al., US Patent Number 2,830,521) with a cable connected to a control diaphragm at one end and to a valve disk at the other end, and with the cable running through a pulley are known, the prior art of record does not disclose or suggest, in combination with the other disclosed limitations, the retainer for the cable assembly that is coupled to the control diaphragm having an opening that allows the end of the cable to slidably move within a cavity of the retainer between the opening for the cable and a position along a predetermined distance of the cavity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3754
